

Please do not allow Indiana's telephone privacy law to be weakened or made secondary to a weak national law!.

I value my privacy dearly, and it so hard to come by. I already pay for the priviledge of having an unlisted phone number. My private home phone should not be co-opted, or my time wasted, by companies for their business purposes without my express permission. I urge you to allow individual states to make and enforce laws that their citizens support.
